

## PROGRAM OF STUDIES

As a middle school student you will be enrolled in a minimum of six classes. In addition to academic classes, you will be offered choices from a balanced curriculum of elective courses. This curriculum is designed to give you the opportunity to explore areas such as computers, visual and performing arts, career and vocational education, foreign language, Skills for Adolescence, and other special interest areas. The middle school program of studies is as follows:

<u>6<sup>th</sup> Grade</u>		<u>7<sup>th</sup> Grade</u>		<u>8<sup>th</sup> Grade</u>	
English	Social Science	English	Social Science	English	Social Science
Math	Physical Education	Math	Physical Education	Math	Physical Education
Earth Science	Elective	Life Science	Elective	Physical Science	Elective

You are placed in academic classes according to your learning needs; that is, according to how much you have achieved in each subject. Listed below are the levels of academic classes and an explanation of each:

**6** The sixth grade is organized to promote a connectedness between students and their teachers. The teachers “team” in order to present core classes of English/social science (ancient civilizations) and science/ math. The students also take physical education and exploratory elective classes.

**6/7 Accelerated** (This applies to math only) These courses are designed for students that are exceptionally high achievers and are capable of learning more than one year of mathematics each year. In 6<sup>th</sup> grade the students learn all of the current year standards and half of 7<sup>th</sup> grade, and in 7<sup>th</sup> grade the students finish the 7<sup>th</sup> grade concepts then learn all of the 8<sup>th</sup> grade standards. The classes are fast paced and require maturity to process the advanced, abstract concepts.

**7/8 CP** These courses are designed to strengthen subject skills to prepare students for College Preparatory (CP) classes or Standard (S) courses in high school.

**7/8 H** These courses are for Honors (H) students who have been recognized for exceptionally high achievement (test scores and grades). The courses offer in-depth coverage of various subject areas, providing an added challenge and enrichment to students. Initial placement depends on a combination of the following recommendations and availability of space.
